**IN THE CLAIMS:**

Please rewrite claim 1 as set forth below in clean form. In accordance with 37 CFR §§ 1.121(b), (c), Applicant has attached to this paper a marked-up copy of claim 1.

1. (Three Times Amended) A solid particulate pharmaceutical dosage form suitable for oral delivery comprising a pharmaceutical agent and a matrix, the pharmaceutical agent being sparingly water-soluble and having a crystalline particulate form, the pharmaceutical agent being at least partially coated with the matrix to enhance the dissolution rate of the pharmaceutical agent in water, the matrix directly contacting the pharmaceutical agent and consisting of one or more water-soluble polymers.
